

Narzędzia frezerskie składane - Frezy jeżowe (Walcowe)

**BT3345.01**

**Charakterystyka:**

Heavy roughing milling cutter that uses very strong inserts allowing deep passes and high feed per teeth. The insert is fixed by Torx screw that allow a good chip evacuation and easy use.

**Zastosowanie:**

This heavy roughing cutter works well on steels, alloyed steels, stainless steels, refractory casts and aluminium alloys. This general milling cutter for diversified manufacture is recommended for conventional milling machines
