

Narzędzia frezerskie składane - Frezy kopiowe

**BT4425,17**

**Charakterystyka:**

Multi-function centre-cutting end mills.

**Zastosowanie:**

Multiple applications - Side milling, drilling and face milling.  
Less time in tool changing on both-conventional and N/C machines.  
Easily able to machine in roughing and finishing applications because of the high rake geometry and high helix which reduce cutting forces for a smoother cut. Longer tool life may be expected because of the low cutting forces generated. Improved performance will be seen in comparison to conventional end mills and mill-drills, especially when ramp milling, drilling, contouring, helical interpolation of bores, pockets or normal profiling.
